If you do not wish to receive this info-sheet anymore, please send a short cancellation request to sales4@siral.com

Dear Customers,
this is a selection of the last novelties offered by Siral S.p.A.

Gastop Series / DVGW certification

00-3451EA
308000806

Certificato CE e DIN-DVGW

Gastop series for gas is designed for home appliances and is characterised by a wide choice of options with reference to connection and lever handle type (long lever, square, T-lever, etc.). Now this series has been certified by DVGW and is suitable for all applications where CE certification is required. "Gastop" series combines perfectly the traditional Siral quality excellence with the request of good value for money.

Stainless Steel Lever Handles

This series of stainless steel lever handles in AISI 304 is particularly suitable for applications in corrosive environments, such as marine environment and naval industry. In fact the steel AISI304 is highly recommended for its qualities of high resistance to corrosion (in order to know more about AISI 304, please visit:

http://www.ravaniacciai.it/aisi304_eng.php). Deliverable on request, this lever handle can be supplied in blank version or with yellow plastic shell for better handling.

High Temperature Seals in EPDM Perox

Vulcanization in peroxide allows to resist to temperatures up to 130° C.

Therefore these seals, deliverable on request, are particularly suitable on valves for hot water and steam.
