Dear Customers,
 this is a selection of the latest novelties offered by Siral S.p.A.

GA-S-TOP SERIES: NEW CATALOGUE

“Gastop” series of brass gas ball valves for home appliances (recent CE certificate from DVGW - see NEWS FROM SIRAL WORLD NO. 1), will soon be presented in a brand new catalogue. Siral’s goal is to facilitate the customer’s choice of the right product by showing all possible versions of the valve in a list with clear and detailed product specifications. Please, if you are interested, send us a short email as to require a free copy of the new catalogue: you will receive it as soon as we get it from the printer, before any other.

VALVES FOR PNEUMATIC ACUTATORS

We are very proud to inform you that we have re-designed completely the series of V3000 ISO brass ball valves for pneumatic actuators:

- extremely low torque values with simultaneous high tightness performance (reached through a complete new design of body and ball seals)
- possibility of coupling with smaller actuators compared to competition with consequent performance improvement at lower costs

these are the specifications of this state-of-the-art valve series, which will be offered both alone or assembled with the “Alphair” actuators. Marketing is scheduled for beginn 2010, but, if you are interested, send us please now a short email request and we will anticipate you the catalogue which is being issued soon.

SPECIAL PRODUCTS
